What is Certified Information Systems Security Professional (CISSP)

A good approach to cyber security, with proportional actions aimed at the right threats, requires insight. Insight into the interests that we must protect and into the corners from which the greatest threats come. Cyber security must primarily offer solutions that do not impede innovation, efficiency or ease of use. A security specialist must therefore be broadly trained to be a fully-fledged discussion partner when it comes to information security.

The internationally recognized Certified Information Systems Security Professional (CISSP) certificate is currently the most important certification in the field of information security. The CISSP training gives you a broad basic knowledge that you can use in daily practice.

During the training the 8 domains of the CISSP Common Body of Knowledge (CBK) are discussed:

- Security and Risk Management
- Asset Security
- Security Engineering
- Communications and Network Security
- Identity and Access Management
- Security Assessment and Testing
- Security Operations
- Software Development Security

The exam is not included in this training.

Who should attend Certified Information Systems Security Professional

(CISSP)

This training is designed for anyone working with information specialists. You work, for example, in the role of:

- Security Consultant
- Security Officer
- ICT network- or system administrator

Prerequisites

No specific prior education is required. A considerable amount of time is expected from the participants. Time consumed for this training:

- Reading book (assuming 6-10 pages per hour): 120 200 hours
- Following training itself: 6 x 8 hours: 48 hours
- Exam preparation: approx. 40 hours (creating exam questions, preparing test exam)

Total: 260 - 340 hours over the entire period.

Objectives

At the end of the course, the participant has:

- A good understanding of the 8 domains within the CBK;
- Sufficient foundation laid to successfully go for the CISSP exam;
- A good insight into the applicability of the theory in daily practice.
