Language Materials	English
Dayparts	4
Price	€1.500,00 excl. VAT No extra costs.

What is Professional Scrum Product Owner

Scrum is the most widely used framework for Agile software development.

In contrast to the simplicity of the Scrum framework itself, a good application in practice is not obvious. One of the success factors of Scrum is an effective Product Owner.

In this training we go through all aspects of Scrum, obviously focusing on the role of the Product Owner. Product management and optimization of value are of major importance in this course.

This training is the official Scrum.org course. Do you have any (theoretical) knowledge of Scrum, you can also choose our one-day Scrum Product Owner training.

After the training you do the exam, online, at a time and place of your choosing. This exam is the global Certified Professional Scrum Product Owner Level I (PSPO I) assessment of Scrum.org.

The cost of the exam are included in the costs of the training.

Who should attend Professional Scrum Product Owner

The training is of interest to all business officials involved in software development based on the Scrum framework, but is specifically designed for those who fulfill the Product Owner role.

More information on this training is available on the Scrum.org website.

We recommend you to read the Scrum Guide prior to training.

The training material and the PSPO I assessment are in English and the training itself is provided in English.

Prerequisites

We recommend you to read the Scrum Guide prior to training. The training material and the PSPO I assessment are in English and the training itself is provided in English.

Objectives

At the end of this training you have broad knowledge of Scrum, with a focus on the role of the Product Owner and you are prepared to take the PSPO I exam of Scrum.org.
