## What is Writing User Stories

You are experienced in working with requirements and now Agile and Scrum show up. What changes?

User stories are used in Agile/Scrum projects to document requirements.

You would like to know how to write user stories in your project. What are the differences, compared to formulating requirements in your non-Agile projects?

After completing this workshop, you will be able to:

- Identify user stories
- Determine the appropriate level of detail needed for user stories
- Document the user stories according to the Agile/Scrum cycle

In this workshop you experience what writing user stories is all about. You detail, using best practices, a lot of user stories. It enables you to acquire insights through active participation in the workshop. Your own experiences and questions are a part of this interactive session.

## Who should attend the Writing User Stories

This course is of interest if you work in Agile environments and:

- use user stories to document requirements;
- interview the business about user stories;
- assess user stories or;
- decide about use cases.

The course is intended for Requirements Specifiers, Business Analysts and Product Owners, but also, for example, Test professionals and Scrum masters.

## Prerequisites

Knowledge of requirements and knowledge of Agile / SCRUM.

## Objectives

At the end of the training you will be able to write better user stories, to split user stories into smaller stories without losing sight of quality.
