What is Object-oriented thinking workshop

This introductory course is suitable for anyone who is faced in their daily work with system development and object-orientation. You will learn the basics of object-oriented thinking and understand the mindset that is required. This does not occur only from learning theory; you will learn hands-on with practical exercises that you will perform using the Unified Modeling Language (UML) and the object-oriented language Java.

By the end of the course you will be able to:

- name and explain Object-oriented (OO) concepts
- apply OO-concepts in simple situations

Who should attend the Object-oriented thinking workshop

This training is interesting for Architects, Analysts, Designers en Programmers. It is expected that you will have some practical experience in system development.

In addition, knowledge of a structured programming language is required.

Prerequisites

The participants are expected to have some practical experience and insight into system development. In addition, some knowledge of a structured programming language is required.

Objectives

After completing the course, the participant is able to: Name object-oriented (OO) concepts and explain how to apply OO concepts in simple situations
