Price	€1.995,00 excl. VAT No extra costs.

What is DEMO Bachelor

DEMO (Design and Engineering Methodology for Organisations) is the leading methodology in the new discipline Enterprise Engineering (EE). In EE, an organization is considered primarily as a purpose-built system. Changing an organization therefore means that it has to be redesigned and reconfigured. This is the only way to achieve unity and cohesion. The DEMO Bachelor training provides a deeper understanding in your profession and provides a solid foundation in the methodology.

By the end of the course :

- You will have insight in the Enterprise Engineering concepts,
- You can create a Construction Model and a Process Model from a pre-defined case,
- You can use Organisational Essence Revelation (OER) in your approach to making these models,
- You will have insight into the positioning of DEMO in relation to the equivalent approaches such as organizational theory approaches (Business Dynamics, Lean, Six Sigma, etc.), BPM approaches (BPMN, EPC, PetriNet, Archimate, etc.), and IS development methods (ER, NIAM, ORM, etc.),
- You will have knowledge of the discipline Enterprise Engineering.
- After this training you will be well prepared to do the DEMO Bachelor exam at the Enterprise Engineering institute (EEi). This exam is not included in the training. If you want to do the exam, please book it via the [Enterprise Engineering institute \(EEi\)](#).

Who is DEMO Bachelor for

The training DEMO Bachelor is designed for professionals in the area of organizations and IT, who would like to be further educated in their profession, and specifically who are looking for a solid methodology to support this.

You are for example employed as:

- Enterprise architect,
- Enterprise consultant,
- Business architect,
- Business analyst,
- Business consultant,
- Information manager,
- Business process manager,
- Quality manager.

There are no prerequisites for the DEMO Bachelor training. Anyone with common sense and an open mind (and some experience with organizations) will be able to follow the course successfully.
