What is Process Modeling and Analysis

Are you looking to describe workflows or redesign processes to make them more efficient? In this high-intensity training, you will collaborate with other participants to improve processes relevant to a given case. By immediately engaging with aspects such as analysis and workflow management, you can quickly apply what you learn to your own work situation. After this training, you will be able to perform the steps involved in modelling and analysing business processes. This includes understanding the products to be delivered, the techniques to be used, and the possible tools, as well as the motives for analysing and modelling different types of processes.

Who should attend Process Modeling and Analysis

- Business Analysts: Professionals who analyse business needs and recommend solutions.
- Process Managers: Individuals responsible for overseeing and improving business processes.
- IT Professionals: Tech experts who implement and support business process management tools.
- Quality Assurance Specialists: Professionals focused on ensuring processes meet quality standards.
- Operations Managers: Individuals managing day-to-day operations and looking to optimize processes.
- Team Leaders: Leaders who need to understand and improve team workflows.
- Change Managers: Professionals who manage organizational change and process improvements.

Prerequisites

Basic understanding of business processes and workflows. Familiarity with business analysis concepts is beneficial but not required.

Objectives

At the end of the training you will be able to:

- Identify and model business processes.
- Analyse processes to identify inefficiencies.
- Apply workflow management techniques.
- Utilize tools for process modelling and analysis.
- Understand the motives behind process analysis and modelling.
- Implement process improvements in real-world scenarios.

This course is designed to provide you with the skills and knowledge to effectively model and analyse business processes, ensuring you can apply these techniques to improve efficiency and effectiveness in your organization.
