

# Data Quality

## Group Training

Training code	CGADAQUACD
Spoken Language	Dutch
Language Materials	English
Dayparts	2
Price	€645,00 excl. VAT No extra costs.

## What is Data Quality

The importance of data has become ever greater as it has since become an essential business tool. Many far-reaching decisions are made based on available data. The consequences for an organization can be disastrous when decisions are made on the basis of incorrect data or on the basis of misinterpretation of data. What characteristics must data have to prevent the collection of erroneous data or misinterpretation? This is the subject of this training. But not everything has been said. When the characteristics are defined, the current quality of data must be measured and improvement processes must be defined and implemented. In this training you will learn about the approach to regulate such processes.

After completing this training, the participant has knowledge of what data quality is and what this means within DAMA-DMBOK. In addition, the participant has insight into the risks of poor data quality and the importance of good data quality.

The participant is able to:

- define data quality
- to measure data quality
- analyze data quality
- improve data quality
- understand the need to proactively improve data quality
- identify the relationship between data quality and other data management processes

## Who should attend the Data Quality

This training is intended for:

- Software engineers
- Business analysts
- Functional managers

- BI consultants

No specific prior education is required.

## Prerequisites

No specific prior education is required.
