What is Management of Risk (M_o_R®) Practitioner

Every organization aims to maximize opportunities and implement projects, programs, and tasks more effectively. The greatest possible result comes from the investment you put in. Within your organization, various ways that opportunities and threats may arise are examined. We can categorize opportunities and threats under the heading 'Risk'. If your risk management is not optimal, Management of Risk describes an integrated approach to risk management for the entire organization. This approach involves everyone in risk management within your organization and creates a structure that invites success. The Management of Risk method from PeopleCert is a model for integrated risk management that can further assist you in setting up risk management.

Who should attend Management of Risk (M_o_R®) Practitioner

- Project Managers: Responsible for planning, executing, and closing projects, ensuring risks are managed effectively.
- Risk Managers: Specialize in identifying, assessing, and mitigating risks within the organization.
- Program Managers: Oversee multiple projects and ensure risks are managed across the program.
- Business Analysts: Analyze business processes and identify potential risks and opportunities.
- Operational Managers: Manage day-to-day operations and ensure risks are mitigated in operational processes.
