What is Agile Requirements

Agile, who doesn't work with it? Agile work affects everyone who works in the discipline of requirements. Working with Agile has surprising consequences in the requirements process.

In this training you learn, but more important experience, how requirements are dealt with in an Agile / Scrum environment. You learn the impact of developing Agile for the requirements process.

This is practiced on the basis of a case.

We take you into the best practices, Agile work forms and techniques such as:

- Vision Board
- Impact mapping
- Story mapping,
- User Stories,
- Refinement,
- Splitting User Stories,
- Definition of Done,
- Definition of Ready and
- Non Functionals.

You practice in the training with different types of exercise, such as collaborate in sub-teams, workshops and presentations.

Who should attend Agile Requirements

The training is for every professional involved in the supply and analysis of requirements in an Agile environment.

You work, for example, in a role as:

- Business Analyst
- Information Analyst

academy

- Requirements engineer
- Developer
- Tester

Prerequisites

Knowledge of the Agile way of working is assumed to be known. Moreover, knowledge of requirements is required at the level of requirements analysis.

During this training you need a laptop.

Objectives

In this training you learn, but most of all you experience, how requirements are dealt with within Scrum. How does Agile develop touch the requirements process, what are the consequences? What are the best practices in this regard?
