What is Agile Requirements

Agile is a methodology that has become a cornerstone in the world of requirements. This training will immerse you in the Agile/Scrum environment, teaching you how requirements are handled and the impact of Agile development on the requirements process. You'll get hands-on experience with a case study and learn best practices and techniques such as Vision Board, Impact Mapping, Story Mapping, User Stories, Refinement, Splitting User Stories, Definition of Done, Definition of Ready, and Non-Functionals. The training includes various exercises like collaborating in sub-teams, workshops, and presentations.

Who should attend Agile Requirements

The training is for every professional who is involved in delivering and analyzing requirements in an Agile environment. For example:

- Business Analyst : Understand the impact of Agile on requirements gathering and analysis.
- Product owner or Requirements Engineer: Understand how to define and prioritize requirements in Agile
- Developer: Gain insights into how requirements are handled in Agile
- Tester : Learn how Agile affects testing requirements.

Prerequisites

Basic understanding of the Agile way of working and in addition knowledge of requirements at the level of requirements analysis is required.

Objectives

- Understand how the Agile/Scrum environment impacts the requirements process.

academy

- Apply Agile techniques such as Vision Board, Impact Mapping, Story Mapping, and more.
- Collaborate effectively in sub-teams, workshops, and presentations.
