Requirements Analysis

Group Training

Training code	CGAREQANCD
Spoken Language	Dutch
Language Materials	Dutch
Dayparts	4
Price	€1.400,00 excl. VAT No extra costs.

What is Requirements Analysis

You live in a rapidly changing world, and it is important to have clear requirements for your solution. Requirements are the common thread in the change process, and you keep coming back to them. How do you approach this in a structured way? After this training, you will know and understand the requirements process. You will work in groups, drafting various types of requirements using an integral case. You will practice the main techniques, and after this training, you will understand what is needed to elicit, formulate SMART, capture, and review requirements. This training will give you experience in how the requirements process works. There is enough time available for asking and answering your specific questions.

Who should attend Requirements Analysis

- Business Analysts: Professionals responsible for analyzing business needs and defining requirements for projects.
- Project Managers: Individuals overseeing project execution who need to ensure clear and actionable requirements.
- Product Managers: Those managing product development and needing to define and prioritize requirements.
- Systems Analysts: Experts analyzing and designing IT systems who require a deep understanding of requirements.
- Software Developers: Developers who need to understand and implement requirements accurately.
- Consultants: Advisors who help organizations improve their processes and need to understand requirements thoroughly.
- Stakeholders: Individuals with a vested interest in the project outcomes who need to understand the requirements process.

Prerequisites

academy

No prior experience in requirements analysis is necessary. However, a basic understanding of project management and business processes will be beneficial.

Objectives

At the end of the training, you will be able to:

- Elicit requirements using various techniques.
- Trace requirements throughout the project lifecycle.
- Formulate SMART requirements.
- Review and validate requirements to ensure quality.
- Apply what you have learned to your work situation.

About Capgemini Academy

Capgemini Academy's professionals offer what people in IT need. Our professionals have a keen eye for motivation, talent and are aware of specific contexts and circumstances. They move people to move. Programmes and courses that originate from daily experience of our both didactical and substantively strong trainers, light a fire within the individual IT professionals.
Real life stories of our professionals' experience that tell how to solve problems and work with the people around it, do the rest.

An organization, like ours, helps people and their organizations day by day to get the best out of themselves and each other. We prepare them to defy tomorrow's challenges. We stimulate learning and curiosity. In order for individual IT professionals and their employers, to build better, longer and more intensive relationships. For mutual benefit.
