What is Selenium Webdriver Cucumber

Selenium is one of the most popular test tools in the world. The possibilities are almost infinite. In this training you will learn how to use Selenium using Cucumber.

Selenium has many possibilities. If you do not have enough experience with Java and / or with Selenium, this can be very difficult. In this training you will learn how to use Selenium (using Java). Cucumber is the plugin that makes Selenium more readable, enabling you to scripts and execute clearer and easier test cases.

In this training you will start hands-on with Selenium Webdriver, learning by doing.

So, do you want to learn to work with Selenium? Then this training is something for you!

Who should attend the Selenium Webdriver Cucumber

This course is intended for:

- Testers
- Business Analysts
- Requirements specialists
- Key Users
- Developers
- Operations
- Dev-Ops Engineers

And anyone else who wants to automate website testing with Selenium Webdriver. It is however useful to have knowledge of Testing in general.

In addition, basic knowledge of Java and Test automation is required for this training. Terms such as variables and constructs must appear familiar. If you do not have this level of knowledge, then we suggest you to follow courses such as: Test Automation Fundamentals and Java Basics.

In this training you will need a laptop, you need to bring this yourself.

Prerequisites

No prior knowledge is required for this training.

Objectives

At the end of the training you will be able to write automatic tests yourself using Cucumber, Selenium Webdriver and Java. You are now able to develop automatic testing in an existing project with Selenium Webdriver and Java.
