What is BCS Practitioner in Requirements Engineering including exam voucher

You want to expand your certification in Business Analysis?

The exam training BCS Practitioner Requirements Engineering gives you the tools to obtain the certificate Practitioner Requirements Engineering.

During the training, you do assignments and practice with exam questions. You are introduced to the structure and documentation of requirements (eg use cases and user stories).

Important topics are stakeholder analysis, identifying requirements, requirements analysis, validation and management.

This training is based on the Business Analysis and Business Analysis Techniques books published by the BCS. Count on about 20 hours of self-study.

This training is part of the process leading to the International Diploma in Business Analysis.

This training includes a voucher for the official, internationally recognized exam.

The costs of the exam voucher are included in the price of the training. Shortly after the start of the training you will receive a voucher with which you can reserve your exam.

Bear in mind that you must plan your exam at least 5 working days in advance.

Who should attend BCS Practitioner in Requirements Engineering including exam voucher

This training is specifically designed for anyone who is already acquainted with business analysis and besides having a clear picture of requirements engineering, also wants to obtain an internationally recognized certificate. Prior knowledge at the level of BCS Business Analysis Foundation is recommended.

In addition to business analysts, this training is also suitable for:

- project managers
- architects
- information analysts
- system analysts
- functional designers
- functional administrators.

Prerequisites

If you have taken the BCS Business Analysis Foundation exam, this gives you a very good starting point. To participate in this training, it is mandatory to have knowledge of the attainment targets as described for the BCS Foundation certificate.

We advise you to follow this training in advance, this is not mandatory.

You do need to be in possession of the book "Business Analysis Fourth edition" (ISBN 9781780175102) as provided with the BCS Foundation training.

You should have read the chapters in this book that are described in the preparatory work for this training.

This book is not provided with this training.

Objectives

Holders of the BCS Certificate in Requirements Engineering should be able to:

- Explain the importance of linking requirements to the Business Case
- Describe the roles and responsibilities of key stakeholders in the requirements engineering process
- Explain the use of a range of requirements elicitation techniques and the relevance of the techniques to business situations
- Analyse, prioritise and organise elicited requirements
- Document requirements
- Identify problems with requirements and explain how requirements documentation may be improved
- Create a model of the features required from a system
- Interpret a model of the data requirements for an information system
- Describe the principles of Requirements Management and explain the importance of managing requirements
- Describe the use of tools to support Requirements Engineering
- Explain the process and stakeholders involved in Requirements Validation
