What is DevOps Professional - Enable and Scale (DASA) training including exam

Did you follow the DevOps Professional - Enable and Scale (DASA) training program and are you especially interested in the four skills areas Courage, Teambuilding, DevOps Leadership and Continuous Improvement? Then sign up for this training!

We not only deal with the theory of the four skill areas, but also make them come alive with various assignments. In addition to the four skill areas, this training also includes a module about the important DevOps principle Value - Customer-centric action. This training is not about technical aspects of DevOps, but about human and cultural aspects!

This training includes the official DevOps Professional - Enable and Scale (DASA) exam. This exam will be done at your chosen place and time after the training. You will be invigilated by computer. To successfully complete this exam, you must have the DASA DevOps Fundamentals certificate. The cost for the exam are included in the price of the training.

Who should attend the DevOps Professional - Enable and Scale (DASA) training including exam

The training is intended for anyone involved in IT development, IT management or IT service management, has a DevOps Fundamentals certificate and wishes to further certify in the "human and organizational aspects" of DevOps.

This includes:

- DevOps engineers
- Product owners
- Integration specialists
- Operations managers
- Incident and change managers
- System Administrators
- Network administrators
- Business managers
- Automation architects
- Enterprise architects

For all details regarding DASA certification, read this syllabus.

Prerequisites

We expect the participants in this training to hold a DASA DevOps Fundamentals certificate.

Objectives

Clarify the importance of DevOps culture and the aspects that can influence it.

Clarify why courage, team building, leadership and continuous improvement are needed in a DevOps environment.

Clarify why courage is essential to enable trust, honesty and experimentation.

Identify and evaluate different types of behavior in a DevOps environment.

Recognize the signals that indicate obstacles and / or team dysfunctions.

Describe how you can form good DevOps teams and assess their maturity.

Make a list of the effects of happiness and motivation on team performance.

Identify how leaders encourage feedback and transparency.

Discuss the factors that leaders can influence to build trust.

Clarify how and why leaders promote a "Safe to fail" environment.

Analyze value streams to improve throughput and flow.

Improve the tools for continuous improvement: structured problem-solving workshops, story map sessions and retrospectives.
