

## SAFe® DevOps (SDP) - (NL)

### Group Training

Training code	CGASAFDOCE
Spoken Language	Dutch
Language Materials	English
Dayparts	4
Price	<b>€1.500,00</b> excl. VAT No extra costs.

### What is SAFe® DevOps (SDP)

The SAFe DevOps (SDP) course provides an introduction to DevOps, focusing on the CALMR (Culture, Automation, Lean, Measure, Recover) approach within the Scaled Agile Framework. This is not a general introductory SAFe-training; see Leading SAFe for that! The emphasis is on practical tools to improve time-to-market and quality in your working environment. During the course, you'll create a Value Stream Map of your current Delivery Pipeline and discover areas for improvement using a case study and the DevOps Health Radar.

This course is the official SAFe course and is delivered by certified trainers. The SAFe DevOps Practitioner (SDP) certification exam is included in the course. The cost of the exam is part of the course price. You will take this online exam at a time and place of your own choice, but within 30 days of the course. In the Scaled Agile online learning environment, you will have access to an e-learning prior to attending the course and to the digital workbook that accompanies the course. You can also use this environment to take a practice test (mock exam). If this is your first SAFe training, a one-year membership to SAFe Studio is included. Through SAFe Studio, you have access to e-learnings, videos, discussion forums, toolkits and templates. We always use the latest training materials from Scaled Agile.

Do you want to know more about this course? Download the brochure and the list of topics via this page: <https://academy.capgemini.nl/en/topic/scaled-agile-framework-safe>. There you will also find an overview of all the other SAFe courses that we offer.

### Who should attend SAFe® DevOps (SDP)

- IT Professionals: Learn how to evaluate and improve your current state using tools like the DevOps Health Radar and Transformation Canvas.

## Prerequisites

A basic understanding of Agile methodologies and principles is required. Prior experience in software development or IT operations is beneficial.

## Objectives

At the end of the training, you will be able to:

- Incorporate continuous testing and security into the delivery pipeline.
- Integrate continuous exploration, integration, and deployment, and release value to end users on demand.
- Design and implement an actionable DevOps transformation plan tailored to your organization.
- Evaluate and improve your current state using tools like the DevOps Health Radar and Transformation Canvas.

## About Capgemini Academy

Capgemini Academy's professionals offer what people in IT need. Our professionals have a keen eye for motivation, talent and are aware of specific contexts and circumstances. They move people to move. Programmes and courses that originate from daily experience of our both didactical and substantively strong trainers, light a fire within the individual IT professionals. Real life stories of our professionals' experience that tell how to solve problems and work with the people around it, do the rest.

An organization, like ours, helps people and their organizations day by day to get the best out of themselves and each other. We prepare them to defy tomorrow's challenges. We stimulate learning and curiosity. In order for individual IT professionals and their employers, to build better, longer and more intensive relationships. For mutual benefit.

Capgemini Academy. We transform IT professionals
