Dayparts	4
Price	<b>€750,00</b> excl. VAT No extra costs.

## What is BIAN Foundation

"There has never been a more exciting time to be part of the financial services industry. The pace of change has never been greater, the competitive landscape continues to expand beyond traditional players and emerging technologies are opening doors that allow financial services providers to find new ways to differentiate themselves and explore the art of the possible. Yet, none of this is going to be possible using traditional approaches.

The Banking Industry Architecture Network (BIAN) is a global, not-for profit association of leading banks, technology providers, consultancy companies, integrators and academic partners with the shared aim to establish and provide a common framework for the banking industry covering almost all the well-known architectural layers.

In this 2 day course, we will explain everything about the BIAN Standard and the major benefits (of using this standard). The course prepares you fully for the BIAN Foundation exam so that you can become a Certified Banking Architect.

In september 2019 this course has a special introduction price and the exam price is included in the price of the training. Starting October 2019 the regular price is in place.

## Who is BIAN Foundation for

"This certification is intended for those enterprise, business and solution architects in the financial services industry (FSI) who are interested in applying the BIAN Industry Standard in their organization and how they can contribute to helping the BIAN standard fulfil their (organization's) needs.

After successfully completing this course and achieving the certification you will be able to directly see the benefits. The course will enable BIAN certified professionals to:

- Ensure more efficient and effective development and integration of software solutions for and between banks;
- Benefit from better industry integration and collaboration through the usage of (open) APIs;
- Enhance the evolution and adoption of shared third party business services;
- Improve the operational efficiency within and between banks and provide the opportunity for greater solution and capability re-use within and among banks;
- Significantly lower the overall integration costs of your organization;
- Ensure the adoption of more flexible business service sourcing models;
- Support FinTechs and RegTechs to gain easier insight into the complex financial services industry

structure.
