Spoken Language	Dutch
Language Materials	English
Dayparts	6
Price	€2.500,00 excl. VAT No extra costs.

What is SAFe® for Architects (ARCH)

The SAFe for Architects (ARCH) course is a three-day program that delves into the crucial role of technical architecture within the Scaled Agile Framework (SAFe). The course covers all architecture-related topics and roles at every level (enterprise, solution, and system architect), and discusses their responsibilities in leading the implementation of SAFe and their role in the change management process. The course stands out with its practice-oriented exercises based on a real-life case.

This course is the official SAFe course and is delivered by certified trainers. The SAFe Architect (ARCH) certification exam is included in the course. The cost of the exam is part of the course price. You will take this online exam at a time and place of your own choice, but within 30 days of the course. In the Scaled Agile online learning environment, you will have access to an e-learning prior to attending the course and to the digital workbook that accompanies the course. You can also use this environment to take a practice test (mock exam). If this is your first SAFe training, a one-year membership to SAFe Studio is included. Through SAFe Studio, you have access to e-learnings, videos, discussion forums, toolkits and templates. We always use the latest training materials from Scaled Agile.

Do you want to know more about this course? Download the brochure and the list of topics via this page: <https://academy.capgemini.nl/en/topic/scaled-agile-framework-safe>. There you will also find an overview of all the other SAFe courses that we offer.

Who should attend SAFe® for Architects (ARCH)

- Enterprise Architects: Learn to align architecture with business value and drive continuous flow to large systems.
- System Architects/Engineers: Understand how to design, implement, and improve architecture.
- Solution Architects: Learn to apply Lean-Agile principles and practices to the role.
- Agile Team Members: Understand the role of architecture in their work.

academy

- Product Managers/Owners: Learn how architecture enables continuous value flow.

Prerequisites

Participants should have familiarity with Agile principles and practices and must have basic SAFe knowledge prior to attending this course.

Objectives

At the end of the training you will be able to:

- Develop and communicate the architectural vision.
- Develop solution vision, intent, and roadmaps.
- Prepare and deliver software effectively and continuously.
- Lead and coach architects and team members during PI Planning and execution.
- Plan for and execute a PI.
- Plan the architectural runway to consistently deliver business value.
- Create clarity and visibility into the architectural vision for an ART.
