### Group Training

Training code	CGASAFLPCE
Spoken Language	Dutch
Language Materials	English
Dayparts	4
Price	€2.000,00 excl. VAT No extra costs.

### What is SAFe® Lean Portfolio Management (LPM)

The SAFe Lean Portfolio Management (LPM) course is all about aligning strategy with execution. It emphasizes the need for change at both the central portfolio layer and the decentralized implementation when transforming to Lean Agile as an organization. The training, based on the SAFe framework, focuses on three components of Lean Portfolio Management: Strategy and Investment Funding, Agile Portfolio Operations, and Lean Governance. Participants will be equipped with practical tools like the current and future portfolio canvas and the portfolio kanban. Aspects of budgeting and measurement at the portfolio level are also covered.

This course is the official SAFe course and is delivered by certified trainers. The SAFe Lean Portfolio Manager (LPM) certification exam is included in the course. The cost of the exam is part of the course price. You will take this online exam at a time and place of your own choice, but within 30 days of the course. In the Scaled Agile online learning environment, you will have access to an e-learning prior to attending the course and to the digital workbook that accompanies the course. You can also use this environment to take a practice test (mock exam). If this is your first SAFe training, a one-year membership to SAFe Studio is included. Through SAFe Studio, you have access to e-learnings, videos, discussion forums, toolkits and templates. We always use the latest training materials from Scaled Agile.

Do you want to know more about this course? Download the brochure and the list of topics via this page: <https://academy.capgemini.nl/en/topic/scaled-agile-framework-safe>. There you will also find an overview of all the other SAFe courses that we offer.

### Who should attend SAFe® Lean Portfolio Management (LPM)

- Portfolio Managers: Learn how to better align strategic business goals with decentralized execution.

## Prerequisites

Everyone is welcome in itself, but the course is especially useful when you:

- are familiar with the general Agile concepts and principles and
- have completed a Leading SAFe or SAFe PO / PM course and
- have experience working in a SAFe environment.

## Objectives

At the end of the course, you will be able to:

- Connect the portfolio to the enterprise
- Maintain portfolio vision and roadmap
- Establish Lean budgets and guardrails
- Create portfolio flow
- Understand how Lean Portfolio Management fits into SAFe
