What is Certified Information Security Manager - CISM Exam Training

Our CISM training not only prepares you for the internationally recognized CISM exam, but also offers you the knowledge and practical examples to safeguard digital security in a way that aligns with the broader objectives of your organization. This training helps you make risk-based assessments as a Security Manager. Security governance, strategy, and incident management must be tailored to the nature and context of your organization. This is a complex issue where business administration and security insights must come together. The CISM training covers technical security issues, but in-depth technical knowledge and experience are not necessary. CISM focuses on the Security Manager rather than the technicians.

Who should attend Certified Information Security Manager - CISM Exam Training

- IT Managers: Oversee and manage IT infrastructure, ensuring security measures are in place.
- Security Consultants: Provide expert advice on security strategies and implementations.
- Risk Management Professionals: Assess and mitigate risks within the organization.
- Compliance Officers: Ensure the organization adheres to legal and regulatory requirements.
- Network Administrators: Manage and secure network infrastructure.
- Security Analysts: Monitor and analyze security threats and vulnerabilities.
- Chief Information Security Officers (CISOs): Lead the organization's security strategy and policies.
- IT Auditors: Evaluate the effectiveness of the organization's security measures.
- Project Managers: Oversee security-related projects and ensure they meet objectives.
- Business Continuity Planners: Develop and implement plans to ensure business operations continue during and after a security incident.

Prerequisites

Participants should have a basic understanding of information security concepts and some experience in managing IT systems. No in-depth technical knowledge is required, but familiarity with security principles will be beneficial. The exam is not included in the training.

Objectives

At the end of the training you will be able to:

- Prepare for the internationally recognized CISM exam.
- Obtain knowledge and practical examples to safeguard digital security in a way that fits the broader goals of the organization.
- Make risk-based assessments as a Security Manager.
- Develop and implement security governance and strategy.
- Manage security incidents effectively.
- Integrate business administration and security insights.
