What is AI Academy - Data Literacy course

The Data Literacy course is an entry level course which gives a high-level overview of the various aspects of data flow. Subjects that will be covered are data collection, data transformation, data processing, data visualization, data analysis and data governance.

We will analyze the different data types, data sources and the process of data collection from these data sources

Next, we'll explain the various data processing steps that are needed to transform data to render it suitable for analysis and insight generation.

Also, you'll gain knowledge about the ways to effectively visualize data. And, the course guides you on effective data management and governance principles.

After following this course, you'll be able to:

- Describe the various activities within the data pipeline starting with data collection, transformation and insight generation
- Explain effective data management and data governance principles
- Explain data and insights using effective visualization techniques

Who should attend AI Academy - Data Literacy course

Do you want an overview of the data pipeline starting from understanding data types to data collection, data transformation, visualization and insight generation from data? Then this training is meant for you!

Prerequisites

None

Objectives

After following this course, you'll be able to:

- Describe the various activities within the data pipeline starting with data collection, transformation and insight generation
- Explain effective data management and data governance principles
