## What is TMap Organizing built-in quality at scale including exam voucher

Organizing QA & testing requires orchestrating, arranging, planning, preparing and controlling the activities. This training course enables professionals that are responsible for organizing QA & testing to acquire necessary knowledge and skills to enable teams to achieve quality ownership. This training course is based on the book "Quality for DevOps teams" and the TMAP body of knowledge on [www.tmap.net](http://www.tmap.net).

## Who should attend the TMap Organizing built-in quality at scale including exam voucher

This training course is for all people that are involved in organizing high-performance IT delivery (such as DevOps and Scrum). This includes roles such as scrum masters, agile coaches, release train engineers, test managers, test masters.

Other relevant roles include QA professionals, testers, business analysts, product owners, developers, quality engineers, users, operations people etc.

### Prerequisites

For this training course basic knowledge of information technology, working in teams and an Agile way of working is required.

## Objectives

During this training course the participants (that typically are involved in organizing, structuring and scaling the IT delivery process) will get knowledge and practical experience with the following QA & testing subjects (amongst others):

- IT delivery models (incl DevOps, Scrum and SAFe®)
- The VOICE model for achieving business value by IT delivery
- CI/CD pipeline and tooling
- QA & Testing topics, such as:
  - o quality & test policy
  - o monitoring & control
  - o anomaly management
  - o reporting & alerting
  - o estimating & planning
  - o metrics and continuous improvement
  - o infrastructure
- Organizing quality engineering overarching multiple teams
- End-to-end testing within a team or over multiple teams
- Quality characteristics and test varieties
- Personal, interpersonal and team skills for effective collaboration within and across teams.
