What is Reskill Track: Data Engineer

The word "data" can no longer be ignored in modern business. Companies have been collecting data for decades. The amount of data available has increased enormously due to the advent of the internet. Today, data is the beating heart behind the success of many companies.

How do you get value from the enormous amount of data that companies have at their disposal today? That is the job of the Data Engineer. As a Data Engineer you work together with your client to create order in the "data chaos". Your job is to organize, manage and make data - often from a large number of different sources - available to the business.

In the Reskill Track: Data Engineer we prepare you to perform this role successfully. We teach you to work with various tools with which you can organize and make data accessible. Creating and optimizing databases is also discussed extensively. You will learn to develop algorithms that make it easier to access and decipher raw data. To ensure that you are able to fulfil the wishes of your organization with technical data solutions, we work on personal skills, such as communication, presentation and consultancy skills.

Who should attend the Reskill Track: Data Engineer

Our tailor-made approach makes this track suitable for most professionals. Data Engineering is a highly technical field and so a feeling for technology, analysis, mathematics and logical reasoning are important elements that you must have in-house. In addition, it is important that you get excited about numbers, statistics, trends and patterns.

Prerequisites

Our Reskill Tracks always start with an extensive intake, carried out by one of our training experts. You also do an assessment to accurately determine your training needs. Based on the intake and assessment, we put together a custom Reskill Track for you that seamlessly matches your personal situation.

Objectives

The exact objective of this Track depends on your personal situation and seniority. After successfully completing this track you will be able to successfully start your first role as a Data Engineer.
