What is Darkweb Foundation including exam voucher

The Dark Web is a section of the internet, which is not accessed with a regular browser. Connections are often encrypted and anonymised and criminal activity has flourished in this space. As a result, it has become increasingly important for IT professionals within corporations and those involved in public sector investigations to have the skills and knowledge to securely monitor the Dark Web.

Dark Web Foundation is a hands-on introductory course, in which a fictional organization, complete with its own website, is used as the context for assignments and case studies.

Drawing on practical experience of high-level security experts and researchers, at the end of the course participants will be able to access, navigate and obtain information from the Dark Web. Due to the hands-on character of this training, you need to bring a device on which you can install and use a Tor Browser and gpg4win.

Who should attend Darkweb Foundation including exam voucher

The Dark Web Training and Certification is an entry-level course, which has been designed for those who want to learn how to securely use the Dark Web. It will be particularly relevant for InformationSecurity professionals, or those in law enforcement and the public sector who would like to monitor the Dark Web. Please note:

- With this training you need a laptop on which you can install and use a Tor Browser and gpg4win.

This training includes a voucher for the official, internationally recognized exam.

The costs of the exam voucher are included in the price of the training. Shortly after the start of the training you will receive a voucher with which you can reserve your online exam.

Bear in mind that you must plan your exam at least 5 working days in advance. For more info check:
