What is MS-050: SharePoint Hybrid Deployment and Migration [MS-050T00-A] including Exam Voucher

The business climate has changed. People want to communicate without collaborative barriers. Businesses want solutions that are both cost-effective and flexible. Organizations start to configure hybrid environments and migrate content to the cloud as the solution. In this course, you will learn how to deploy and configure the SharePoint Server 2019, designed to meet the demands of modern workstyles. You will also learn how to configure and manage various SharePoint service applications to prepare for a hybrid deployment. Then, you will learn how to plan and implement SharePoint hybrid scenarios that provide seamless users experience. Eventually, you will learn how to design the content migration process and available resources and tools to use while migrating content to SharePoint and OneDrive in Microsoft 365.

This course uses MOC (Microsoft Official Courseware) and will be given by an experienced MCT (Microsoft Certified Trainer).

See the below modules for more information:

Module 1: SharePoint infrastructure

This module is about fundamental SharePoint Infrastructure. It describes the components in SharePoint farm. It also discusses how to install and configure SharePoint farm.

Lessons

- Plan a SharePoint farm
- Overview of SharePoint Server 2019
- Install and manage a SharePoint farm

Module 2: SharePoint authentication and security

This module is about SharePoint Authentication and Security. It introduces different authentication methods in SharePoint 2019.

Lessons

- Plan authentication
- Configure federated authentication

Module 3: SharePoint content management

This module is about SharePoint Content Management. It discusses the content structure in SharePoint. It also provides details on authorization and content access in SharePoint.

Lessons

- Plan sites and site collections
- Manage access to content
- Configure and manage site collections

Module 4: SharePoint service applications

This module is all about SharePoint service applications and workflow. It describes how to provision and manage a BCS service application and User Profile service application. Specifically, we discuss how to import and export BDC models as well as how to import user properties to SharePoint.

Lessons

- SharePoint service applications and workflow
- Plan and configure BCS and Secure Store service
- Plan and configure user profile service

Module 5: Plan and configure Managed Metadata service

This module is about the integral functionalities, such as the Managed Metadata Service, content types, and term sets, that allow you to create and disseminate an information architecture. It introduces the purpose of content types as well as the concepts behind the managed metadata service, including taxonomies, term sets, and enterprise keywords.

Lessons

- Manage content types
- Overview of Managed Metadata service
- Configure the Managed Metadata service

Module 6: Plan and configure search

This module is about enterprise search service application. It provides details on planning and configuring content sources, crawl schedules, and crawl rules. It also discusses how to provision search management of a range of search components, such as Query Rules, Result Types and Display Templates.

Lessons

- Plan enterprise search
- Configure enterprise search
- Manage enterprise search

Module 7: Overview of SharePoint hybrid scenarios

This module is all about planning SharePoint Server hybrid. It provides an overview of SharePoint hybrid scenarios as well as requirements for configuration.

Lessons

- Overview of SharePoint hybrid scenarios
- Plan SharePoint Server hybrid

Module 8: Implement SharePoint hybrid scenarios

This module is focused on implementing SharePoint hybrid scenarios. Specifically, it discusses the hybrid configuration roadmaps, including the configuration of hybrid infrastructure and hybrid picker. It also introduces On-premises data gateway to enable using Microsoft 365 features in SharePoint Server 2019.

Lessons

- Implement SharePoint hybrid scenarios
- Configure on-premises data gateway

Module 9: Implement SharePoint hybrid search

This module is focused on SharePoint hybrid search. It introduces different types of hybrid search, including cloud hybrid search and hybrid federated search. It explains how to set up hybrid search and configure search results

Lessons

- Overview of SharePoint hybrid search
- Configure SharePoint hybrid search

Module 10: Plan content migration

This module is all about planning the migration process to the cloud. It provides an overview of resources and tools to leverage during migration process.

Lessons

- Overview of content migration
- Prepare for content migration

Module 11: Migrate content to Microsoft 365

This module is focused on using SharePoint Migration Tool (SPMT) to migrate content to the cloud. Specifically, it discusses the requirement and limitation of SPMT. It introduces different migration methods for different data source, such as file shares and SharePoint content.

Lessons

- Migrate content with SPMT
- Migrate content with Migration Manager
- Migrate content with Mover

Who should attend MS-050: SharePoint Hybrid Deployment and Migration [MS-050T00-A] including Exam Voucher

This course is designed for IT Professionals who deploy and manage Microsoft SharePoint and OneDrive in their organizations. Students in this course are interested in Microsoft SharePoint and OneDrive.

Also, you will receive an Exam Voucher. Enlist today!

Prerequisites

Participants meet below prerequisites before joining the training:

- Experience with Windows PowerShell.
- Basic understanding of SQL Server management.
- Basic understanding of networking, including DNS.
- Working knowledge of windows server administration.
- Basic understanding of Active Directory and Azure AD.
- Basic understanding of mobile device management, and alternative operating systems (Android and macOS).

Objectives

After completing this course, you will be able to:

Describe the MinRole feature in SharePoint 2019.

- Describe how to install and configure SharePoint 2019.
- Describe how to implement high availability for SharePoint.
- Provision a BDC Service Application instance.
- Configure the Secure Store Service application.
- Describe how to configure My Sites in SharePoint 2019.
- Describe the available SharePoint Hybrid Scenarios.
- Describe the requirements for SharePoint hybrid configuration.
- Plan for SharePoint Server hybrid.
- Plan for content migration process.
- Describe available resources and tools to leverage during migration process.
- Access data to be migrated using SharePoint Migration Assessment Tool (SMAT).
- Migrate content to the cloud using SharePoint Migration Tool (SPMT).
- Migrate content to the cloud using Migration Manager.
- Migrate content to the cloud using Mover.
- Manage and monitor migration process.

Exam information

- Exam duration (minutes): 120
- % extra time for non-native speakers: -
- Number of exam questions: 40-60
- Minimum correct questions: variable
- Exam style: Multiple choice
- Open book: No
