

Programming fundamentals with JavaScript

Group Training

Training code	CGAPFJAVCE
Spoken Language	English
Language Materials	English
Dayparts	5
Price	€1.500,00 excl. VAT No extra costs.

What is Programming fundamentals with JavaScript

Learning the fundamentals of programming is something independent of language syntax. A lot of concepts are shared over a lot of different programming languages, and therefore knowing these programming fundamentals in one language will give you a head start in mastering others. In this course, we will discuss these transcending fundamental concepts and apply them via JavaScript. A scripting language that enables you to create dynamic websites, which makes it one of the three core languages we use on the web. This course will enable beginning (web) developers to digest and write code themselves, via the following subjects:

- Introduction to JavaScript and explanation about variables, data types, operators, and the console.
- Theoretical explanation and hands-on assignments on conditions, loops, and regular expressions
- Theory on scoping and working with functions and the Math library
- Learning about arrays accompanied by several assignments
- Getting acquainted with objects via theory and assignments

After this training, you will be able to breathe life into your websites by implementing logic to your projects. From reusable functions to looping over arrays, after this course you will be ready to make your pages dynamic!

Who should attend Programming fundamentals with JavaScript

Beginning (web) developers who want to learn the basic concepts of programming, or already know these concepts but want to experience it via client-side powered JavaScript.

Prerequisites

During this training you need a laptop with access to internet on which installation of software is allowed, namely: IDE (preferably Visual Studio Code). Also, some basic knowledge of HTML and CSS will be helpful in digesting some concepts but is not mandatory.

We also offer courses to help you to acquire basic knowledge of HTML and CSS, for more information, look at the courses below:

- HTML Fundamentals
- CSS Fundamentals

Objectives

After completing this course, you will be able to:

- Understand the place JavaScript has in the web domain
- Implement JavaScript inside of your web projects
- Learn about programming concepts like:
 - Variables
 - Data types, with special emphasis on objects and arrays
 - Operators
 - Conditions
 - Loops
 - Functions
 - Scoping
- Utilize the power behind regular expressions
- Use functionality from the Math Library

About Capgemini Academy

Capgemini Academy's professionals offer what people in IT need. Our professionals have a keen eye for motivation, talent and are aware of specific contexts and circumstances. They move people to move. Programmes and courses that originate from daily experience of our both didactical and substantively strong trainers, light a fire within the individual IT professionals. Real life stories of our professionals' experience that tell how to solve problems and work with the people around it, do the rest.

An organization, like ours, helps people and their organizations day by day to get the best out of themselves and each other. We prepare them to defy tomorrow's challenges. We stimulate learning and curiosity. In order for individual IT professionals and their employers, to build better, longer and more intensive relationships. For mutual benefit.

Capgemini Academy. We transform IT professionals
