

Scrum Product Owner (EN)

Group Training

Training code	CGASCRPOCE
Spoken Language	English
Language Materials	English
Dayparts	2
Price	€1.100,00 excl. VAT No extra costs.

What is Scrum Product Owner

Scrum is the most widely used framework for Agile software development. The simplicity of the Scrum framework itself is in contrast to the complexity of applying it in reality. One of the key success factors of Scrum is an effective Product Owner. This training focuses on the roles and responsibilities of the Product Owner, covering topics such as product vision, product backlog, user stories, and releases. We provide practical tools and discuss common practice situations to help you become a successful Product Owner. Prior to the course, you should follow our e-learning Scrum Basics and study the Scrum Guide. After completing the training, you can take the test for the worldwide accredited Professional Scrum Product Owner Level I (PSPO I) from Scrum.org online, at a time and place of your choosing. In preparation for this test, you will receive a set of sample questions to practice with.

This is our own Scrum Product Owner training, which is especially useful if you already have some (theoretical) knowledge of Scrum. We also offer the more extensive two-day official Professional Scrum Product Owner training from Scrum.org.

Who should attend Scrum Product Owner

- Software Developers: Learn how to work effectively within a Scrum Team and understand the role of the Product Owner.
- Project Managers: Gain insights into Agile project management and the importance of the Product Owner role.
- Business Analysts: Understand how to define requirements and work with the Scrum Team as a Product Owner.
- Product Managers: Learn how to manage a product backlog and prioritize features as a Product Owner.
- Team Leaders: Understand the Scrum framework and how to support your team in adopting Scrum.

Prerequisites

Prior knowledge of Scrum is beneficial, but not mandatory.

Objectives

At the end of the training you will be able to:

- Understand the role of the Product Owner in a Scrum Team.
- Apply Scrum principles in real-world situations.
- Prepare for the PSPO I exam.
