Price	€1.600,00 excl. VAT No extra costs.

What is Architecture Fundamentals

This course is an introduction in the world of architecture, applicable to both agile and traditional environments. We explore IT concepts such as services, infrastructure, and integration from an architectural perspective, along with analysis methods like business model canvas, customer journeys, and stakeholder management. You'll gain insights into the role of an architect and how they interact with agile teams and stakeholders. You'll also get an overview of current architecture methods like TOGAF and Archimate, and agile frameworks like SAFe. This course is a steppingstone towards understanding the world of architecture and architects, and possibly taking the next step towards a role as an architect. It also provides a solid foundation for further training in TOGAF, Archimate, DEMO, SAFe for architects, Architecture in agile context (practitioner), Open Agile Architecture, and Enterprise Design.

Who should attend Architecture Fundamentals

- Business representatives like Product owners and Project Managers: Gain a deeper understanding of architecture to manage products and value delivery projects more effectively.
- Developers: Learn about architectural principles to design and implement robust solutions.
- Business Analysts: Understand how architecture influences business processes and decision-making.
- IT Consultants: Enhance your consulting skills with a solid understanding of architectural frameworks and methods.
- Aspiring Architects: Take the first step towards your dream of becoming an architect.

Prerequisites

No specific prerequisites are required for this course. However, a basic understanding of IT concepts will be beneficial.

academy

Objectives

At the end of the training, you will be able to:

- Define what architecture is and how it adds value.
- Know relevant business and IT architecture methods, frameworks, and patterns.
- Elicit the role and skills of an (agile) architect.
- Have meaningful conversations with architects.
- Define your next step as a (future) architect.
