What is Introduction To Testing

Are you a newcomer to the world of quality assurance and testing? Do you lack experience but want to get up to speed as quickly and effectively as possible? Then this training is perfect for you! In this course, you'll dive into the daily life of a software tester. Alongside an experienced coach, you'll explore all the activities, techniques, and skills that are crucial for a tester. You'll learn about the importance of testing, how to set up a test, create test scripts, register findings, use test techniques, and much more. After this training, you'll be ready to start working as a tester in practice. You might also consider pursuing certifications like TMAP or ISTQB, although that's not the primary goal of this training.

Who should attend Introduction To Testing

- Software Developers: Learn how to test the software you create, ensuring it's of the highest quality.
- Business Analysts: Learn how to test business requirements are met in the final product.
- Quality Assurance Professionals: Enhance your testing skills and learn new techniques.

Prerequisites

No prior knowledge or experience in testing is required. An interest in quality assurance and a willingness to learn are all you need!

Objectives

At the end of the training you will be able to:

- Understand the basic principles of quality assurance and testing.
- Learn the basic principles of the new T-Map methodology (Quality For Cross Functional Teams).
- Evaluate your current situation and determine the best approach for your organization regarding

academy

quality and testing.

- Set up and deploy your tests in a practical and structured way.
- Understand all the basic principles of testing.
