- Authorization and security

# Who should attend Introduction modeling with Sparx Enterprise Architect

Increasingly, organizations use modeling tools to develop and manage their documentation and artifacts

such as Project Start Architectures, Reference Architectures, documentation, but also software, database and message definitions. Standards are often used for this in such as the architecture language ArchiMate, BPMN, UML, ER, and DMN. Sparx's Enterprise Architect is ideally suited for this. The choice for this product is easy to explain, because there are multiple modeling methods. In addition, the product offers multiple forms to publish the models such as reports, html pages and export to different standards. The last advantages are the adaptability and expandability in combination with a very competitive price. However, how do you use a modeling tool within your own organization, which modeling languages do you choose and how do you manage, develop and communicate your models based on simple diagrams?

#### **Prerequisites**

During this training you need a laptop on which you can install the following software: Sparx. A free version is available at <a href="https://www.sparxsystems.eu/">https://www.sparxsystems.eu/</a>.
For Mac users, the installation manual can be found here: <a href="https://sparxsystems.com/enterprise architect user guide/17.0/getting st...">https://sparxsystems.com/enterprise architect user guide/17.0/getting st...</a>

#### Objectives

In this workshop you will become acquainted with the extensive possibilities of both a number of architectural languages and the functionalities in Sparx Enterprise Architect through practice. You work hands-on on a simple model and learn the basics of Sparx Enterprise Architect.
