What is Data Security and Privacy in a Data Driven Organisation

The importance of data and the value derived from it is becoming increasingly clear to organizations. With the introduction of the GDPR, attention to Data Security and Data Privacy has grown. This training focuses on maximizing the value from your data while ensuring GDPR compliance. You will learn to navigate the balance between GDPR and your information needs, understand how to grant data access to your employees, protect personal data within data flows, and apply methods and techniques to safeguard personal data. The training emphasizes the application of theory in practical cases, delivered by expert trainers.

Who should attend Data Security and Privacy in a Data Driven Organisation

- Enterprise architects and data architects: Professionals who need to include data security and data privacy in their architecture.
- Business Analysts and Information Analysts: Professionals who work with data and need to understand how to properly design solutions while protecting personal data.
- Data Analysts: Professionals who work with data and need to understand the implications of GDPR on their work.
- Data Scientists: Individuals who create models and algorithms and need to ensure they are compliant with data privacy regulations.
- IT Managers: Professionals who oversee data systems and need to ensure their organization is compliant.
- Data Protection Officers: Individuals responsible for overseeing data protection strategy and implementation to ensure compliance with GDPR requirements.

- Compliance Officers: Professionals who ensure that their organizations adhere to legal standards and in-house policies.

Prerequisites

There are no specific requirements to participate in this training. During the training you need a laptop.

Objectives

At the end of the training you will be able to estimate when which data can be made available to whom and what conditions are required for this.
