What is Introduction Big Data

In this 'Introduction Big Data' training, you will explore the vast world of Big Data, a collection of data that is so large and complex that traditional databases cannot efficiently store or process it. You will learn the basic concepts and techniques of Big Data and how it fits within the data architecture. The training will also cover various trends and developments in the field of Big Data.

Who should attend Introduction Big Data

- Data Engineers: Professionals who work in data driven environments and need to incorporate Big Data solutions.
- Business Analysts and Information Analysts: Individuals who map requirements for data systems and create logical designs for them and want to utilize the power of Big Data.
- Data Architects: Those who design and build data systems and want to incorporate Big Data solutions.
- Data Analysts: Professionals who work with data and want to understand the potential of Big Data.
- Data Scientists: Professionals who build models and algorithms and can benefit from the additional insights provided by Big Data.
- IT Managers: Professionals overseeing IT infrastructure who need to understand how Big Data fits into their strategy.
