What is ETL - Extract, Transform, Load

ETL stands for Extract, Transform, and Load. This training will help you gain insights into these processes, which extract your data from one environment, transforms it in your desired way, such that it can be loaded into a new data environment. During this training, the participants will dive deeper in all the steps that need to be taken while extracting data. We will also cover the building blocks for transforming data and everything that plays a role in loading the data in your new data environment. Participants will also learn about management aspects of ETL, process flows for slowly changing dimensions, error handling and performance tuning.

Who should attend ETL - Extract, Transform, Load

- Data Engineers: Professionals who design and build data processing systems.
- Data Analysts: Professionals who work with data and need to understand the ETL process.
- Database Administrators: Those who manage and maintain database systems.
- Business Intelligence Professionals: Those who use data to make business decisions.
- IT Professionals: Those who need to understand data handling processes.

Prerequisites

There are no specific requirements to participate in this training.

Objectives

At the end of the training, you will be able to:

- Understand how the ETL process works.
- Identify tools and approaches for ETL.

- Understand the added value of ETL.

This training covers all the key aspects of ETL and is designed to provide a comprehensive understanding of the subject.
