Dayparts	6
Price	€2.300,00 excl. VAT No extra costs.

What is SAFe Release Train Engineer (RTE)

The Release Train Engineer (RTE) is a unique role in SAFe, forming a trio of leaders with product managers and system architects. This role is critical in leading Agile Release Trains (ARTs) to deliver value. The RTE creates the right environment, facilitates the right meetings, and gathers the right people to make decisions based on the right data. In this three-day course, you'll learn to execute SAFe and continuously improve PI Planning and other vital SAFe events. You'll discover how to coach leaders, teams, and Scrum Masters in new processes and mindsets. You'll also get the guidance and tools you need to work effectively in remote environments with distributed teams.

This course is the official SAFe course and is delivered by certified trainers. The SAFe Release Train Engineer (RTE) certification exam is included in the course. The cost of the exam is part of the course price. You will take this online exam at a time and place of your own choice, but within 30 days of the course. In the Scaled Agile online learning environment, you will have access to an e-learning prior to attending the course and to the digital workbook that accompanies the course. You can also use this environment to take a practice test (mock exam). If this is your first SAFe training, a one-year membership to SAFe Studio is included. Through SAFe Studio, you have access to all articles of the SAFe-framework, SAFe Copilot, e-learnings, videos, discussion forums, toolkits and templates. We always use the latest training materials from Scaled Agile. Do you want to know more about this course? Download the brochure and the list of topics via this page: <https://academy.capgemini.nl/en/topic/scaled-agile-framework-safe>. There you will also find an overview of all the other SAFe courses that we offer.

Who should attend SAFe Release Train Engineer (RTE)

- Release Train Engineers: Prepare for your role as RTE, or advance in performing it.
- Scrum Masters: Prepare for a possible future role as RTE.
- Agile Coaches: Understand how to support the RTE role.

Prerequisites

It is essential that participants have knowledge of SAFe and/or work in a SAFe-environment. Preferably participants have experience as a Scrum Master.

Objectives

At the end of the training, you will be able to:

- Lead ARTs and large solutions in a SAFe organization
- Apply Lean-Agile knowledge and tools to release value
- Foster relentless improvement
- Build a high-performing ART by becoming a servant leader and coach
- Plan for and execute a PI
- Create an environment of relentless improvement
- Lead and serve your ART
