

## Testing Accessibility (NL)

### Group Training

Training code	CGATOTOCDE
Spoken Language	Dutch
Language Materials	English
Dayparts	2
Price	€700,00 excl. VAT No extra costs.

### What is Testing Accessibility

The training provides participants with a concise introduction to accessibility and why it is necessary, whilst outlining the responsibilities of the development team in this subject. The training focuses on using the Web Content Accessibility Guidelines (WCAG) as a standard for testing accessibility. Participants will learn how to apply WCAG principles and success criteria to evaluate the accessibility of digital content per category: Semantics, Visual, Responsive Design, Screen reader fun, Images, Audio & Video, Forms, Tables, Widgets. Additionally, the training covers available testing tools and techniques for assessing accessibility. Participants will gain practical knowledge on how to use these tools effectively to identify accessibility issues and ensure compliance with WCAG standards.

### Who should attend Testing Accessibility

- Web Developers: Learn to integrate accessibility into your development process.
- UX/UI Designers: Understand how to design accessible interfaces.
- Quality Assurance Testers: Gain skills to test digital content for accessibility.
- Project Managers: Ensure your projects meet accessibility standards.
- Content Creators: Create accessible content for all users.
- Product Managers: Oversee the development of accessible products.
- IT Professionals: Implement accessibility best practices in your IT infrastructure.
- Educators: Teach accessibility principles to your students.
- Business Analysts: Analyze and ensure accessibility compliance in business processes.
- Accessibility Advocates: Promote and implement accessibility within your organization.

### Prerequisites

Basic knowledge of web development and design principles is recommended. Familiarity with HTML, CSS,

and JavaScript will be beneficial but not mandatory.

## Objectives

At the end of the training you will be able to:

- Understand the importance of digital accessibility.
- Apply WCAG principles and success criteria.
- Evaluate digital content for accessibility.
- Use various tools and techniques to test accessibility.
- Identify and address accessibility issues.
- Ensure compliance with WCAG standards.
- Create inclusive digital content.
- Enhance user experience for all users.

## About Capgemini Academy

Capgemini Academy's professionals offer what people in IT need. Our professionals have a keen eye for motivation, talent and are aware of specific contexts and circumstances. They move people to move. Programmes and courses that originate from daily experience of our both didactical and substantively strong trainers, light a fire within the individual IT professionals. Real life stories of our professionals' experience that tell how to solve problems and work with the people around it, do the rest.

An organization, like ours, helps people and their organizations day by day to get the best out of themselves and each other. We prepare them to defy tomorrow's challenges. We stimulate learning and curiosity. In order for individual IT professionals and their employers, to build better, longer and more intensive relationships. For mutual benefit.

Capgemini Academy. We transform IT professionals
