What is Business Analysis and Agile

Discover the world of Agile Business Analysis with this interactive training! Specially designed for experienced professionals who have sunk their teeth in various business analysis challenges. This training not only provides theoretical insights but brings the dynamics of business analysis to life with practical examples based on of your own experiences, whether you work within your organization or have completed various business analysis tasks as a consultant.

Participate in this training and get answers to questions such as:

- How do I provide a detailed description of the solution in advance?
- How do I describe the related requirements at a detailed level?

But that's not all! This dynamic course also delves into essential issues such as:

- What does it mean to embrace an Agile mindset?
- What are the differences between methodologies that implement Agile, such as Scrum, DevOps and DSDM?

Discover the art of timing in solution design and be inspired by the interactive approach of our training.

Who should attend Business Analysis and Agile

This interactive training is tailor-made for a diverse group of experienced professionals who have taken on various challenges within the domain of business analysis. Whether you are a seasoned expert within your organization or have fulfilled a variety of business analysis tasks as a consultant, this training provides valuable insights and practical applications to take your skills to the next level.

Suitable for, but not limited to:

- Business Analysts: Professionals who deal with business analysis on a daily basis and want to deepen and broaden their insight.
- Project Managers: Managers involved in projects who strive to better understand Agile Business

Analysis to increase the success of their teams.

- Consultants: Both internal and external consultants who strive for more effective methods for conducting business analyzes and creating value for their clients.
- Product Owners: Those responsible for maximizing product value will benefit from insights into Agile principles for more effective product development.
- Functional Administrators: Professionals who form the link between users and IT, and who want to understand how Agile principles can improve their work.
- IT Managers: IT industry executives looking to integrate Agile into their business analytics processes for a more flexible and responsive approach.

This is your opportunity to discover the power of Agile Business Analysis and participate in a training that accelerates your professional development.

Prerequisites

There are no specific admission requirements for participating in the Agile Business Analysis training. It is important that you have several years of practical experience as a Business Analyst or have experience in carrying out business analysis tasks. This hands-on experience provides the ideal foundation to fully understand and integrate the in-depth concepts and practical usage during the training.

Objectives

After this dynamic training, you will:

- Have a solid understanding of what Agile is and the impact it can have on the business world.
- Understand the interrelationships between Scrum, DevOps and DSDM, and being able to recognize the different roles within these methodologies.
- Understand the complexity of product development in an Agile environment.
- Have the knowledge to determine where and how to perform business analysis in methods such as Scrum, even if the role of a business analyst is not explicitly described.
