Price	€800,00 excl. VAT No extra costs.

What is Introduction Data Platforms

Explore the benefits of the modern (cloud-based) data platforms (data lakes, data lake houses, cloud data warehouses), compared to 'classic' solutions like in-house data warehouses and data virtualization, but also where these classic solutions provide functionality not (yet) available in modern platforms.

Who should attend Introduction Data Platforms

This training is suitable for:

- Data Engineers: Learn the main strengths and weaknesses of the various data platform technologies.
- Data Scientists: Understand what a data platform can and can't do in data provision.
- Solution Architects: See how the different types of data platforms compare, and what the main points of attention are when implementing a specific one.
- Enterprise Architects: Enhance your knowledge of the role of data platforms within the enterprise architecture, and of the difference between in-house and cloud-based solution alternatives.
- Business Analysts: Gain insights into utilizing data platforms for informed decision-making.
- IT Managers: Understand the impact of data platforms on the IT landscape.

Prerequisites

Prior to this training you need basic familiarity with data concepts and a keen interest in leveraging data for organizational growth.

Objectives

After this training you will be able to:

- Understand the role of data platforms in data ecosystems.
- Learn about the impact of 'big data' on data platforms.
- Compare data platform technologies and architectures.

academy

- Gain insight in the strengths and weaknesses of these architectures.
- Understand how cloud-based solutions can provide scalability.
