What is MS-4006: Copilot for Microsoft 365 for Administrators

Enrolling in the "Copilot for Microsoft 365 for Administrators" training is essential for ensuring your organization can effectively implement and manage Copilot within a secure and compliant environment. This course provides administrators with the knowledge to safeguard organizational data while leveraging Copilot's capabilities. Our trainers bring extensive practical experience, transforming theoretical concepts into real-world applications and best practices.

"Copilot for Microsoft 365 for Administrators" is an intensive one-day course designed to equip administrators with the necessary skills to implement, manage, and secure Copilot within their Microsoft 365 environment.

Who should attend MS-4006: Copilot for Microsoft 365 for Administrators

This training is suitable for:

- Microsoft 365 Administrators: Enhance your skills in implementing and managing Copilot.
- IT Security Professionals: Learn to secure user access and manage data protection.
- Compliance Officers: Ensure data compliance with sensitivity labels and classification.
- System Administrators: Integrate Copilot into your existing IT infrastructure.
- IT Managers: Oversee the implementation and adoption of Copilot in your organization.
- Data Protection Officers: Safeguard sensitive information within the Microsoft 365 environment.
- Network Administrators: Understand the networking requirements and security measures for Copilot.

Prerequisites

Participants should have completed a role-based administrator course such as Messaging, Teamwork, Security and Compliance, or Collaboration. Basic functional experience with Microsoft 365 services and a proficient understanding of general IT practices and PowerShell is recommended.

Objectives

After this training you will be able to:

- Describe the design and architecture of Copilot for Microsoft 365.
- Implement Copilot within your Microsoft 365 environment.
- Manage secure user access and roles within Copilot.
- Classify and protect sensitive information using sensitivity labels.
- Apply best practices for data security and compliance in Microsoft 365.
- Troubleshoot and resolve common issues related to Copilot.
- Drive Copilot adoption within your organization.
