What is Functional Design Workshop

What's involved in a functional design? How can business functions and business processes easily be modelled? What are usable ways of modelling techniques? What are the consequences of a functional design for the organization? Are these the questions that you are asking? If so, we offer you training to provide the answers. You will gain insight into the role of a functional designer. In addition, you are introduced to various modelling techniques.

During this training, the activities of the functional designer are discussed. Participants are introduced to the various modelling techniques that can be used. In addition, you will be given an understanding of the relationship between different activities and associated modelling techniques when creating functional specifications. Attention is also paid to the reasons why certain techniques may or may not be used by the functional designer.

Who should attend Functional Design Workshop

The training is intended for people who want to know more about the work of a functional designer and understand in detail the modelling techniques used. Some business experience and/or experience with system development at a functional level is highly desired.

Prerequisites

The training is intended for persons who want to become acquainted with the work of the functional designer and who want to understand and understand the associated techniques and representations. Some business experience and / or experience with system development on a functional level is highly desirable.

During this training you need a laptop with access to internet.

Objectives

The activities of the functional designer are discussed in this workshop. The participant delves into the various portrayals that are used to model reality. In addition, he / she gains insight into the relationship between various activities, associated techniques and mapping methods when creating functional specifications. Attention is also paid to the reasons for whether or not to use certain techniques as a functional designer.
