

Architecture Fundamentals (NL)

Group Training

Training code	ARCH-AW
Spoken Language	Dutch
Language Materials	English
Dayparts	4
Price	€1.600,00 excl. VAT No extra costs.

What is Architecture Fundamentals

With small exercises, Architecture Fundamentals takes you into the world of Enterprise and Solution architecture that is applicable to the agile way of working and within more traditional (waterfall) environments.

In the training we look, from an architecture point of view, at IT concepts such as applications, servers and databases, and to analysis methods such as business model canvas, customer journeys and stakeholder management.

In addition, you will gain insight into what architecture is, what an architect does and how an architect interacts with agile teams and management. You also get an overview of current architecture methods such as TOGAF and Archimate and agile frameworks such as SAFe. This training forms a good basis for understanding the world of architecture and architects better and possibly taking the next step towards a role as an architect. The training also provides a good basis for further training such as TOGAF, Archimate, DEMO, SAFe for architects, Agile Architectuur Practitioner, Open Agile Architecture and Enterprise Design.

Who should attend Architecture Fundamentals

This training is for Business Analysts, Product Owners, software developers, IT managers and Program managers, all with an interest in learning about architecture and possibly developing as an architect.

Prerequisites

You have at least a Bachelor level of thinking and working and a few years of work experience in the field of IT.

During this training you need a laptop.

Objectives

After completing this course, you will:

- Be able to define what architecture is and how it adds value.
- Know relevant business and IT architecture methods, frameworks, and patterns.
- Be able to elicit the role and skills of an (agile) architect.
- Be able to have meaningful conversations with architects.
- Be able to define your next step as a (future) architect.
