What is Certified Information Security Manager - CISM Exam Training

Our CISM training not only prepares you for the internationally recognized CISM exam, but above all offers you the knowledge and applicable practical examples to safeguard digital security in a way that goes beyond the broader objectives of the organization.

This training helps you to make risk-based assessments as a Security Manager. Security governance, strategy and incident management, among other things, must be geared to the nature and context of the organization. A complex issue for which business administration and security insights must come together. The CISM training covers technical security issues, but in-depth technical knowledge and experience is not necessary. CISM focuses on the Security Manager and less on the technicians.

Who should attend Certified Information Security Manager - CISM Exam Training

The CISM training is interesting for people with diverse backgrounds and goals:

- Security Managers (CISO)
- Information Security Officers
- Security Consultants
- Governance, Risk & Compliance specialists

Prerequisites

During this training you need a laptop with access to internet.

Objectives

Prepare for the internationally recognized CISM exam, and obtain knowledge and applicable practical examples to safeguard digital security in a way that fits the broader goals of the organization.
