#### What is Functional Management for professionals (VFB®)

The field of Functional Application Management is currently developing rapidly. Nowadays, there are Functional Application Managers in many shapes and sizes, from application-oriented specialists to broadbased generalists, but they all have one primary goal: to provide a reliable, agile, scalable, and innovative information system for the entire organization. The program has a duration of five days and consists of ten modules of a half-day. Each module provides participants with concrete tools to translate theory and tools directly into practice. During the training, the participants work on this. Below is a brief overview of the modules:

- Module 1: What is functional application management?
- Module 2: Using information systems
- Module 3: Managing information systems
- Module 4: Monitoring information systems
- Module 5: Collecting triggers
- Module 6: Translating triggers
- Module 7: Determining priorities
- Module 8: Realizing the change
- Module 9: Accepting the change
- Module 10: Implementing the change

#### Who should attend Functional Management for professionals (VFB®)

- Functional Managers: Professionals responsible for managing and optimizing information systems within their organizations.
- IT Managers: Individuals overseeing IT departments who need to understand the functional aspects of

## academy

information management.

- Business Analysts: Experts analysing business needs and translating them into functional requirements.
- Application Managers: Specialists focusing on the maintenance and development of software applications.
- Information Officers: Professionals ensuring the integrity and availability of information within the organization.
- System Administrators: Technicians responsible for the upkeep, configuration, and reliable operation of computer systems.
- Team Leaders: Supervisors overseeing teams that work with information systems and need to understand functional management principles.

#### Prerequisites

Participants should have a basic understanding of information systems and some experience in managing or working with IT projects. Familiarity with organizational processes and structures is beneficial.

#### Objectives

At the end of the training, you will be able to:

- Define the role and responsibilities of a Functional Manager.
- Analyse and optimize information systems within an organization.
- Manage the influences on information systems from both internal and external sources.
- Assess the impact of changes and prioritize actions accordingly.
- Implement and monitor changes to ensure they meet agreed-upon standards.
- Apply practical tools and techniques directly in your role as a Functional Manager.

## About Capgemini Academy

Capgemini Academy's professionals offer what people in IT need. Our professionals have a keen eye for motivation, talent and are aware of specific contexts and circumstances. They move people to move. Programmes and courses that originate from daily experience of our both didactical and substantively strong trainers, light a fire within the individual IT professionals. Real life stories of our professionals' experience that tell how to solve problems and work with the people around it, do the rest.

An organization, like ours, helps people and their organizations day by day to get the best out of themselves and each other. We prepare them to defy tomorrow's challenges. We stimulate learning and curiosity. In order for individual IT professionals and their employers, to build better, longer and more intensive relationships. For mutual benefit.
