What is PL-200: Microsoft Power Platform Functional Consultant [PL-200T00-A]

The Microsoft Power Platform empowers organizations to automate business processes, develop their own rich app experiences, and connect with customers better and faster. In this training, students will learn to perform discovery, capture requirements, engage subject matter experts and stakeholders, translate requirements, and configure Power Platform solutions and apps. They will supplement their learnings with hands-on labs to create application enhancements, custom user experiences, system integrations, data conversions, custom process automation, and custom visualizations. Power Platform is comprised of four key products: Power Apps, Power Automate, Power BI, and Power Virtual Agents. In this training, we will cover these four applications in depth, with additional focus on Microsoft Dataverse (formerly Common Data Service), AI Builder, connectors, and portals. This training uses MOC (Microsoft Official Courseware) and will be given by an experienced MCT (Microsoft Certified Trainer).

Who should attend PL-200: Microsoft Power Platform Functional Consultant [PL-200T00-A]

- Business Analysts: Learn to automate business processes and develop rich app experiences.
- IT Professionals: Gain skills in system integrations, data conversions, and custom process automation.
