

Open Agile Architecture O-AA™ (NL)

Group Training

Training code	CGAOPAGACD
Spoken Language	Dutch
Language Materials	English
Dayparts	4
Price	€2.000,00 excl. VAT No extra costs.

What is Open Agile Architecture O-AA™

Open Agile Architecture is the standard from The Open Group for setting up Agile Architecture. It contains a collection of methods and techniques for working with architecture in a (scaled) Agile environment. Open Agile Architecture supports the digital transformation of organizations and provides a common language for (enterprise) architects and agilists, including developers, testers, scrum masters and managers.

Open Agile Architecture is based on the principle that agile and digitization go hand in hand. O-AA discusses the axes function, perspective, level and time. O-AA is an addition to SAFe and LESS, with an emphasis on the way in which the organization and associated (enterprise) architecture is set up. O-AA gives further depth to concepts from SAFe, such as intentional and emerging architecture.

Who should attend Open Agile Architecture O-AA™

This training is suitable for:

- any role involved in Digital Transformation at an architectural level
- Agilists and business managers who need to understand the importance of architecture when shifting towards an Agile at scale model, and who want to extend their skills
- Digital architects working in outcome-based, team-led, and product-centric organizations
- Enterprise Architects, Solution Architects, Security Architects, and Software Architects who want to

extend their scope in an Agile at scale world

Prerequisites

None

Objectives

After this training you have acquired:

- An understanding of the importance of architecture when deploying Agile at scale
- An ability to apply best practices and techniques for architecting with agility
- An ability to deliver Agile architecture in support of Digital Transformation
- A common language with Enterprise Architects and Agilists
