Dayparts	4
Price	€1.400,00 excl. VAT No extra costs.

What is Workshop Problem & Change analysis

Organizations change, there is no doubt about that!

But if a change is implemented without being clear in advance why, there is no grip on the direction and the result of the change.

Problem analysis helps clarify the problems, make them accurate, quantified and comparable so the organization is able to set the right priorities in its approach.

If the problem is clear you would also like to solve it. And that means you will apply change analysis. So formulate solution alternatives. You will then map the problem area, analyze the causes, think about solutions and analyze the impact for the organization.

This enables the choice between the different solution alternatives.

Who should attend Workshop Problem & Change analysis

If in your role you need to ask the "why" question with a change or suggested solution to a problem then this is the right training for you.

Your role is for example:

- Business analyst,
- Functional manager,
- System analyst or
- Organizational expert.

Prerequisites

No Prerequisites

During this training you need a laptop.

Objectives

Being able to perform a problem analysis: identification, description, quantification

Being able to perform a change analysis:

- describe problem area
- cause analysis
- compile change alternatives
- impact analysis
